

AGUSTIN BUSTAMANTE

FULL STACK DEVELOPER JR

agusbus95@gmail.com | [LinkedIn](#) | [GitHub](#) | Río Negro, Argentina

ABOUT ME

I am a passionate professional dedicated to the continuous improvement of my skills in software development. My focus spans the entire spectrum of development and Data Structures knowledge, from creating appealing interfaces with **React-Redux** on the Front-end, to constructing robust and efficient solutions on the server side using **Flask, Express.js, and Node.js** on the backend. My experience encompasses a variety of projects, both academic and professional, which propels me to seek opportunities in Full Stack, Front-end, or Back-end roles that demand the use of **Python or Javascript**, in order to produce exceptional outcomes.

WORK EXPERIENCE

Chewed Pixel Studios

NYC (Remote)

Feb. 2023 - Aug. 2023

Jr. Software Engineer

Projects:

- **VILA Web-AR Platform:** Revolutionizing augmented reality interactions through an innovative web-based solution that fosters collaboration between developers and business owners. This platform empowers the creation of augmented and virtual reality solutions tailored for businesses, leveraging a diverse range of technologies, including **Python, Flask, SQL, Microsoft Azure, and JavaScript, ThreeJs**, among others.
- **Door Store:** Played a pivotal role in the Door Store Website project, a cutting-edge e-commerce platform specializing in customizable furniture, particularly tables. I designed the frontend logic for a dynamic table configurator using **JavaScript, HTML, CSS, and Canvas**. This configurator empowers users to create personalized combinations of dimensions, materials, legs, drawers, shelves, and more, all while providing real-time 3D model visualizations. This innovative feature allows customers to interactively design and preview their tables, selecting measurements, materials, colors, and accessories.

Henry

Argentina

Full Stack Web Developer

Nov. 2022 - Feb. 2023

Main Project:

- **Imperio Boreal:** Spearheading an Ecommerce platform, I orchestrated user and product management via a versatile CRUD interface. The project boasts an authentication system fortified with user roles, accompanied by an adeptly crafted admin panel for seamless control over products, users, and orders. Key technologies driving this success include **React, Redux, Typescript, Auth0, Redux, JavaScript, MongoDB, Mongoose, Cloudinary, and Express.js**.

Rohrer INC.

Chicago, IL

Jr. Supervisor

2018

As Jr. Supervisor at Roher, oversaw plastic machinery operations, managed a 30-member team, and coordinated inter-departmental tasks to ensure efficient production. Led data-driven improvements, optimizing plant efficiency and contributing to overall company success.

EDUCATION

Full-Stack Web Developer

Mar 2022 - Feb 2023

- SoyHenry Academy, Argentina

Master Degree in Media Marketing

May. 2016 - Dec. 2016

- Arlington Texas University

Bachelor's degree in Business Administration

Mar. 2010 - Nov. 2014

- Abraham Lincoln Institue

TECH SKILLS

SOFT SKILLS

- HTML5 & CSS
- JavaScript, TypeScript, NodeJS, ExpressJs, RESTful API
- React & Redux
- Python, Flask, Jinja2, Docker & Redis.
- SQL, MongoDB, AzureSQL & PostgreSQL
- AWS S3 & Microsoft Azure SQL
- GIT & GITHUB
- Data Structures Knowledge
- Agile & Scrum Methods

- Problem Solving, Effective Communication and Teamwork
- Adaptability and Critical Thinking
- Organization and Planning
- Self-Discipline and Resilience
- Continuous Learning
- Creativity
- **English C1 Proficient**
